

The only do it yourself sublimation coating solution.

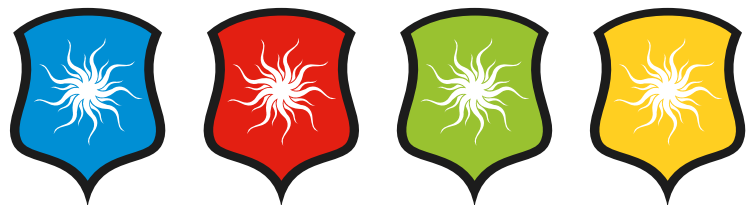

Create new sublimation substrates and decorate almost any surface ... quickly and easily

Digi Coat is the first coating system designed specifically for sublimation decoration. These products open a new range of materials for use as sublimation substrates... expanding your creative options and delivering exceptional value.

Digi Coat delivers new possibilities for digital decoration by making almost any substrate a sublimatable surface. Digi Coat products include four core coatings that allow designers and decorators to treat materials and uncoated substrates for dye sublimation.

Designed for ease of use, each of the coating products is delivered in aerosol can for easy application. The spray-on coatings then require brief heat curing in an oven. Specific instructions are provided with each can.

- Sublimate onto untreated substrates
- Sublimate onto dark or black substrates
- Sublimate on glass and clear substrates
- Protect against UV degradation

Product Code	Description	Unit	RRP £	Case Price £	RRP \$	Case Price \$
DC-AP250	Digi-Coat Adhesion Promoter 250 ml	12	£12.95	£155.40	\$19.95	\$239.40
DC-OW400	Digi-Coat Opaque White Base Coating 400 ml	12	£14.95	£179.40	\$24.99	\$299.88
DC-SC400	Digi-Coat Clear Sublimation Coating 400 ml	12	£14.95	£179.40	\$24.99	\$299.88
DC-TW400	Digi-Coat Translucent White Coating 400 ml	12	£14.95	£179.40	\$24.99	\$299.88
DC-UV400	Digi-Coat UV Protection Coating 400 ml	12	£14.95	£179.40	\$24.99	\$299.88
